

George Maratos Readme file

In this zip file you will find the following

A **Homework 2a pdf** that contains the answers to the first part of the homework

A directory called **programmingPart** which contains all the files for part 2

inside the directory you will find the following source files:

calculate.c compute.c header.h main.c Makefile populate.c

and the training corpus labeled “trainingCorp.txt”

and the answers to the MLE calculation part in the pdf **MLE**

IF YOU WISH TO RUN MY CODE YOURSELF:

type “make” inside of the directory which produces an executable called “hw2”

to run type “./hw2 <trainingcorpus>”

ps: you might have problems with parsing the tags if your corpus is not in the same format as mine
